

## The BREEZE

Global spotlight on air pollution control

August 2019

### FOCUSING ON....Unique air pollution challenges which drive innovative solutions

Acid gas emissions can sometimes be overwhelming, no matter what the industry. But assisting customers to solve these challenges is what we do. With a track record of helping hundreds of companies reach regulatory compliance, [SOLVAir®](#) is expert in the treatment of air pollution. From [coal fired power plants](#) and small [incinerators](#) to [waste-to-energy plants](#) and more, our history of innovation in the [air pollution marketplace](#) has helped customers find solutions that work. Call us today...we welcome the opportunity to help!

### WHAT'S UP! QUICK FACTS: Analyze this!

Why evaluating residue from a sodium sorbent DSI system makes it more efficient...

Can analyzing residue from a DSI system really help the air pollution control process become more efficient? And if so, why? Our recent issue of [Quick Facts](#) answers these questions and more about why maintaining the rate of sodium sorbent utilization can be a cost-effective tool in helping optimize its consumption!

Contact me for more information about our sodium sorbents, services and DSI!
